PROFESSIONAL EXPERIENCE

Software Engineer

Ensemble Technologies Inc.

August 2023 - Present

Remote, United States

- Led frontend team for Atlas Health, a patient assistance management platform serving 20+ health systems. Facilitated 10,000+ daily workflows and managed 1M+ patient records.
- Promoted to Tech Lead within 8 months; scaled frontend team from 3 to 8 engineers while onboarding and mentoring both junior and senior developers in Agile/Scrum environment.
- Architected 8+ core platform modules: patient workflows, prescriber management, communication center (SMS/fax), 5 reporting dashboards, and role-based access control with 10+ permission levels.
- Integrated MeiliSearch for patient and case log search, cutting query latency from 1,400ms to 120ms (91% improvement).
- Established component library with 20+ reusable components (modals, data tables, forms), reducing feature development time by 35%.
- Conducted 26% of team code reviews. Maintained 45% commit share and 27% of pull requests across 3 Atlas repositories.
- Shipped Electron.js desktop IDE with auto-update system and macOS notarization, deployed to 50+ users for offline-first app development.
- Configured custom Keycloak authentication themes using Keycloakify and Docker, enabling 5+ client organizations with branded SSO.

Junior Software Developer

Contour Software

June 2022 - July 2023

Lahore, Pakistan

- Developed Identity Management System using IdentityServer4 and .NET 6, rolled out across 15+ internal projects utilized by 500+ end-users.
- Executed OAuth2 authentication flows including password reset and role-based permissions, lowering authentication-related support tickets by 60%.
- Constructed React frontend with RTK Query managing 50+ API endpoints. Wrote 200+ unit tests with NUnit achieving 85%+ code coverage.
- Designed Azure Durable Functions orchestrator for ETL pipeline, transforming 100,000+ records nightly from 4 acquired company databases into a centralized reporting warehouse.

PROJECTS

Bujit

[Try Now](#)

- Engineered offline-first Progressive Web App with natural language expense input, tracking 1,000+ transactions in personal daily use.
- Unified 5 input methods (voice, auto-complete, presets, gestures, keyboard) with Gemini AI insights and Google Sheets sync.

Easy Accounting

[Desktop App](#)

- Launched cross-platform desktop accounting application for Windows and macOS, leveraged by 10+ SMEs with offline-first SQLite database.
- Delivered automated backup system with local file exports and Supabase cloud sync, ensuring zero data loss across 500+ accounting entries.

- Built interactive automaton design tool featuring 6 transformation algorithms (NFA to DFA, minimization, regex conversion).
- Released educational platform adopted by FAST-NUCES for Theory of Automata course, utilized by 900+ students across 3 academic semesters.
- Created visual automaton editor with drag-and-drop interface, enabling real-time state machine visualization and validation.

SKILLS

- **Languages:** JavaScript, TypeScript, HTML, CSS, Go, C#, SQL
- **Frontend:** React.js, Next.js, Tailwind CSS, Electron.js, Shadcn UI, Framer Motion, RTK Query, Jotai
- **Backend:** Node.js, Express.js, .NET 6, Apollo GraphQL, REST APIs, Microservices
- **Databases:** PostgreSQL, MariaDB, SQLite, Firebase Firestore, MeiliSearch, Database Design
- **DevOps & Cloud:** Git, GitHub Actions, Docker, CI/CD, Agile, Scrum, Software Development Life Cycle
- **Tools:** Vite, Turborepo, Azure Durable Functions, Webpack, YAML, JSON

EDUCATION

Bachelor of Science in Computer Science

FAST - National University of Computer and Emerging Sciences

August 2018 - December 2022

Lahore, Pakistan
